City General Hospital | Patient Services Division

## Patient Information

|                    |                           |                    |                   |
|--------------------|---------------------------|--------------------|-------------------|
| <b>Patient ID:</b> | MRN-20241015-7842         | <b>DOB:</b>        | March 12, 1978    |
| <b>Name:</b>       | John A. Smith (Fictional) | <b>Age:</b>        | 46 years          |
| <b>Insurance:</b>  | BlueCross Plan 4432       | <b>Visit Date:</b> | October 15, 2024  |
| <b>Physician:</b>  | Dr. Emily Rodriguez, MD   | <b>Dept:</b>       | Internal Medicine |

## Chief Complaint

Patient presents with persistent fatigue for 6 weeks, shortness of breath on exertion, and mild intermittent chest discomfort. Reports poor sleep quality and reduced exercise tolerance.

## Vital Signs

| Parameter        | Value       | Reference Range | Status     |
|------------------|-------------|-----------------|------------|
| Blood Pressure   | 148/92 mmHg | <120/80 mmHg    | ELEVATED   |
| Heart Rate       | 88 bpm      | 60-100 bpm      | Normal     |
| Temperature      | 37.1 C      | 36.1-37.2 C     | Normal     |
| O2 Saturation    | 96%         | >95%            | Normal     |
| BMI              | 29.4        | 18.5-24.9       | Overweight |
| Respiratory Rate | 18/min      | 12-20/min       | Normal     |

## Assessment and Plan

**Primary Diagnosis:** Hypertension (I10) - Stage 2, newly diagnosed

**Secondary:** Suspected obstructive sleep apnea - refer for polysomnography

### Plan:

- Start lisinopril 10mg daily. Follow-up BP check in 2 weeks.
- Order CBC, CMP, lipid panel, HbA1c, TSH.
- Chest X-ray and ECG to rule out cardiac cause of dyspnea.
- Dietary counseling referral - DASH diet guidance.
- Sleep study referral - Dr. Park, Sleep Medicine.
- Return in 4 weeks or sooner if symptoms worsen.
